SUBJECT: Compliance Evaluation Inspection of a RCRA Small Quantity
Generator, Coyne Textile Services, Huntington, WV

On the above date, a Compliance Evaluation Inspection was conducted at Coyne Textile Services by Rebecca Robertson, Waste Management Division. Mr. Frank Brosious was the facility representative present during the inspection. He was advised of the purpose of the inspection as required by RCRA 3007(b) and the Hazardous Waste Management Regulations and was presented credentials.

This facility cleans towels, mats, shop rags, and other rental textile needs. Materials are dry-cleaned using perchloroethylene (F002) which is collected by the Safety-Kleen Corporation in Ashland, Kentucky.

There were no wastes stored on-site during the inspection. Safety-Kleen removes the material every two to three weeks, so maximum accumulation time would normally be 14 to 21 days.

Paperwork appears to be in order, that is notification and annual reports, etc.

I completed the inspection, thanked the facility representative for his time and cooperation and departed.

Compliance Evaluation

The following violation was noted during the inspection:

1. No telephone numbers and emergency information was posted by the telephones as required by Section 10.1.3.d.2 of the West Virginia Hazardous Waste Management Regulations.

Inspector Concerns
